01

The Big Picture

End-to-end procurement from request to delivery

After the APP is approved, the procurement process begins. Here's how your purchase needs go from a request on your desk to actual items delivered to your office:

The 4 Main Phases:

KEY POINT

As an End User, your main job is Phase 1 (creating the PR). Phases 2-4 are handled by the Supply Officer, BAC, and HOPE. You'll get notifications as your request progresses!

02

Who Does What?

Your role in the procurement process

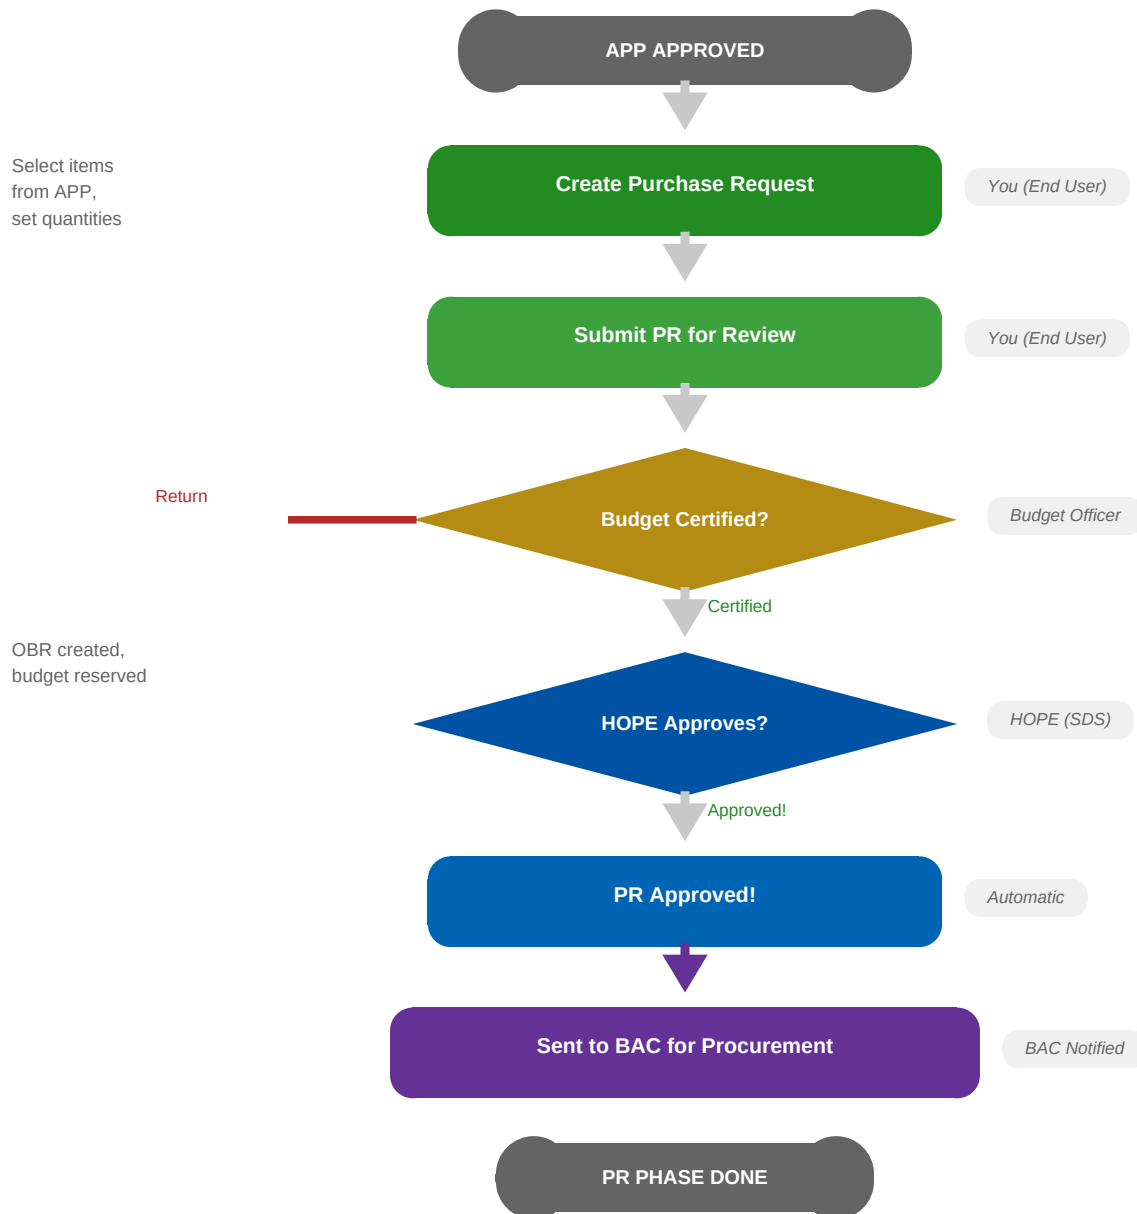

NOTIFICATIONS

Every step sends automatic notifications to the next person in line. Watch for the badge on your sidebar -- it tells you when something needs your attention.

03

Purchase Request (PR)

Creating and getting your PR approved

PR Steps Explained

1

Create Your PR (Draft)

End User

Go to Procurement > Purchase Requests > New. Select items from the approved APP, set quantities and estimated costs. Your PR number is auto-generated (e.g., PR-SDO-2026-0001). Save as draft -- you can edit anytime before submitting.

2

Submit for Review

End User

Click 'Submit'. The system checks: at least 1 item, budget within APP allocation, and split-contract threshold warnings (over P1M for goods). The Budget Officer gets notified automatically.

3

Budget Certification

Budget Officer

The Budget Officer verifies funds are available. They create an OBR (Obligation Request) which reserves the budget from your office's allocation. If budget is insufficient, the PR is returned to you with notes.

4

HOPE Approval

HOPE / SDS

The HOPE reviews the certified PR and gives final approval. Once approved, the PR moves to 'in_procurement' status and the BAC is notified to begin the buying process.

PR NUMBERS & OBR

Your PR gets a unique number like PR-SDO-2026-0001. When budget is certified, an OBR (Obligation Request) is created too, reserving the money. If the PR is cancelled, the OBR is reversed and budget is freed.

04

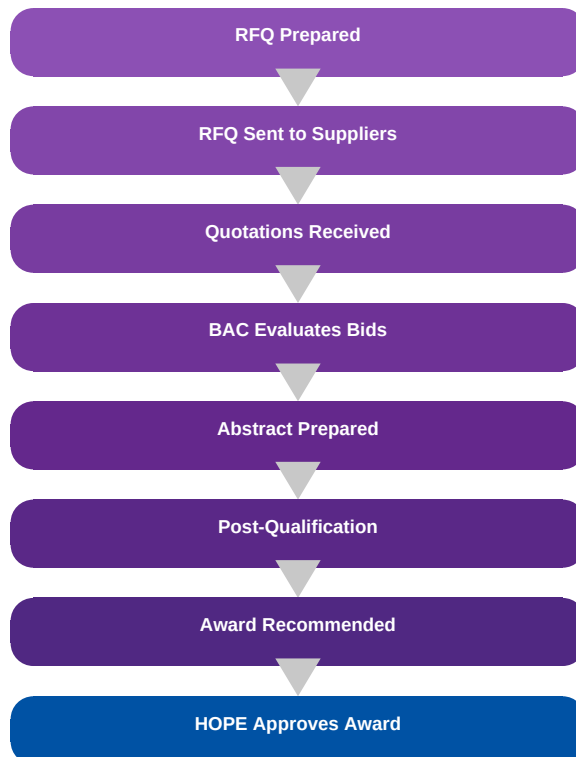

Bidding & Awards

How the BAC finds the best supplier

After your PR is approved, the BAC takes over. The procurement method depends on the amount and type of items:

Method	When Used	How It Works
Small Value (SVP)	Under P1,000,000	Get 3 quotations, pick the best
Shopping	Under P1,000,000	Compare prices from at least 3 shops
Competitive Bidding	Over P1,000,000	Full public bidding with ads, pre-bid, evaluation
Direct Contracting	Special cases	Single source when justified
Emergency	Urgent needs	Fast-track for emergencies
Negotiated	Failed bids	After two failed competitive bids

Most Common: Small Value Procurement (SVP)

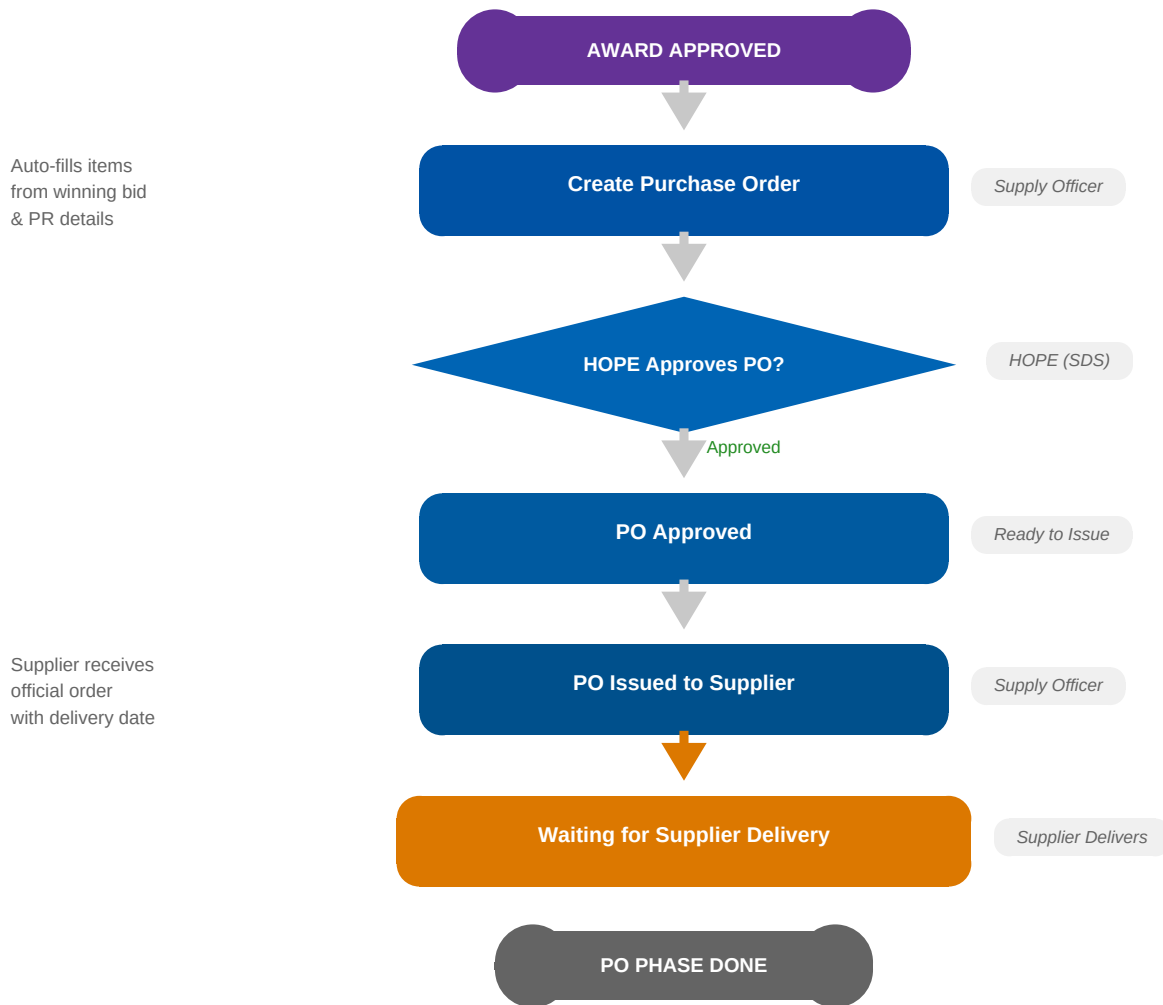

FOR END USERS

You don't need to do anything during this phase! The BAC and Supply Officer handle everything. You'll get a notification when the award is approved and a PO is created.

05

Purchase Order (PO)

The official order to the supplier

PO Steps Explained

1

PO Created

Supply Officer

After the BAC awards a supplier, the Supply Officer creates the PO. Items and prices are auto-filled from the winning bid. The PO number is generated (e.g., PO-SDO-2026-0001). Includes delivery date, address, and payment terms.

2

HOPE Approves PO

HOPE / SDS

The HOPE reviews the PO details (supplier, amounts, terms) and approves it. This is the final authorization before the order goes to the supplier.

3

PO Issued to Supplier

Supply Officer

The approved PO is officially sent to the supplier. The issued_at date is recorded. The supplier now has a legal obligation to deliver the items by the specified date.

4

Awaiting Delivery

Supplier

The supplier prepares and delivers the items. The PO status automatically updates as deliveries are recorded: 'partially_delivered' or 'fully_delivered'.

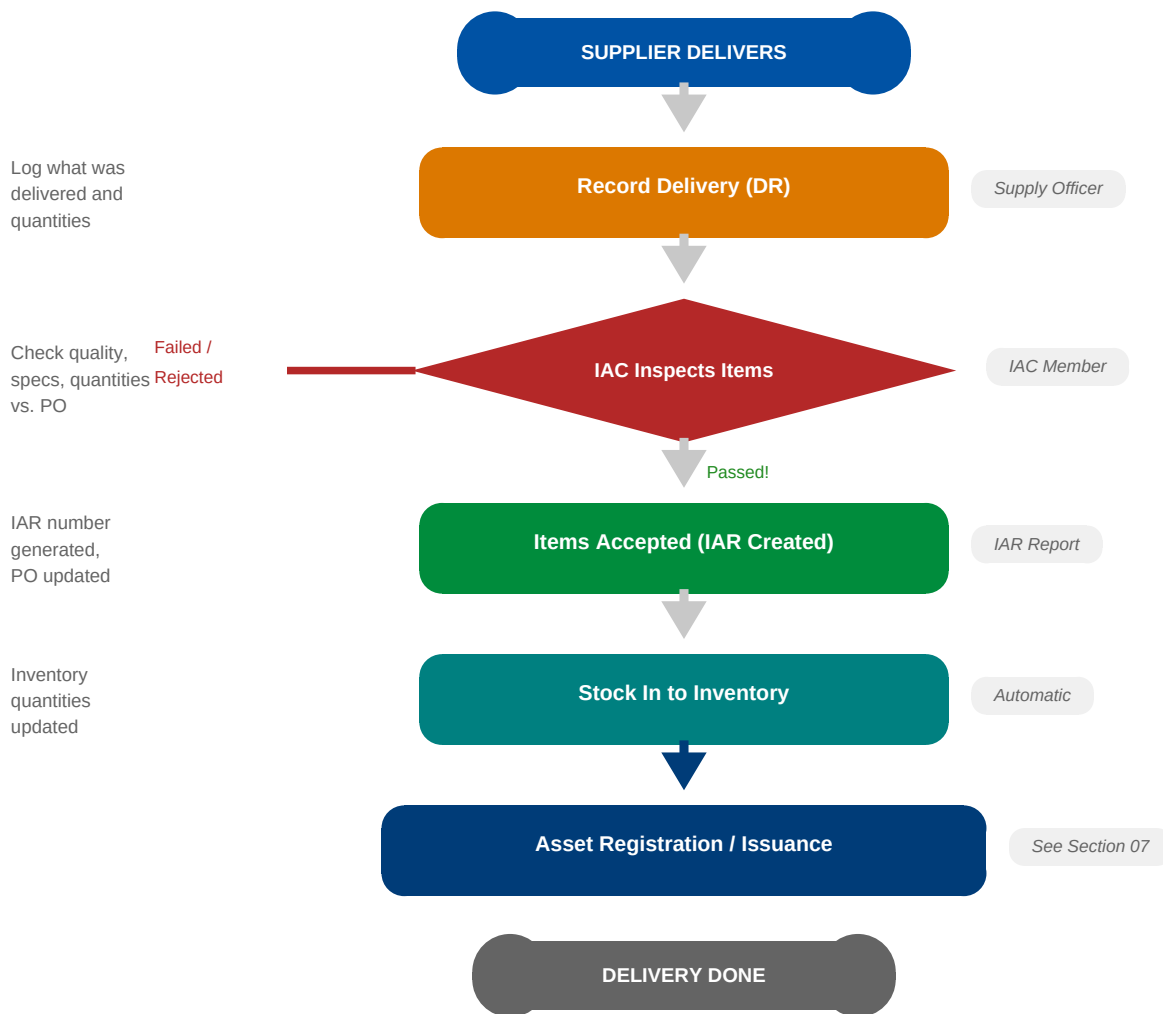

PO NUMBERS

Each PO gets a unique number like PO-SDO-2026-0001. The PO amount may differ from the PR estimate because it uses the actual bid prices from the awarded supplier.

06

Delivery & Inspection

Receiving goods and quality checks

Delivery & Inspection Steps Explained

1

Record Delivery (DR)

Supply Officer

When the supplier delivers, the Supply Officer logs it in the system: which PO, what items, how many delivered. A Delivery Receipt number is generated (e.g., DR-SDO-2026-0001). IAC members are notified to come inspect.

2

IAC Inspection (IAR)

IAC Member

The Inspection and Acceptance Committee checks each delivered item against the PO: correct specs? right quantity? good quality? They mark each item as accepted or rejected with reasons. An IAR (Inspection & Acceptance Report) is generated.

3

Inspection Results

System

PASSED: All items accepted -- PO moves to 'completed'. PARTIAL: Some items rejected -- supplier must redeliver the rejected items. FAILED: All items rejected -- may trigger re-procurement.

4

Stock In

Automatic

Accepted items are automatically added to inventory. Stock movements are recorded as an immutable ledger -- every stock-in is tracked for audit purposes.

PARTIAL DELIVERIES

Suppliers can deliver in batches. Each delivery is recorded and inspected separately. The PO status shows 'partially_delivered' until everything arrives and is accepted.

07

After Delivery

Asset registration, ICS, PAR, and RIS

Once items are accepted and in inventory, they need to be properly registered and issued to the people who need them:

Consumables	Semi-Expendable	PPE (Property)
Paper, ink, etc. Issued via RIS (Requisition & Issue Slip) Stock decreases as items are used	Chairs, small equip. Issued via ICS (Inventory Custodian Slip) Tracked per person	Laptops, vehicles Issued via PAR (Property Ack. Receipt) Full asset tracking & depreciation

Key Documents After Delivery

RIS

Requisition & Issue Slip

When you need consumable supplies (paper, ink, cleaning materials), you submit a request. The Supply Officer issues items from stock and gives you a RIS as your receipt.

ICS

Inventory Custodian Slip

For semi-expendable items (chairs, small equipment under P50,000), you sign an ICS acknowledging you're the custodian. You're responsible until you return or transfer it.

PAR

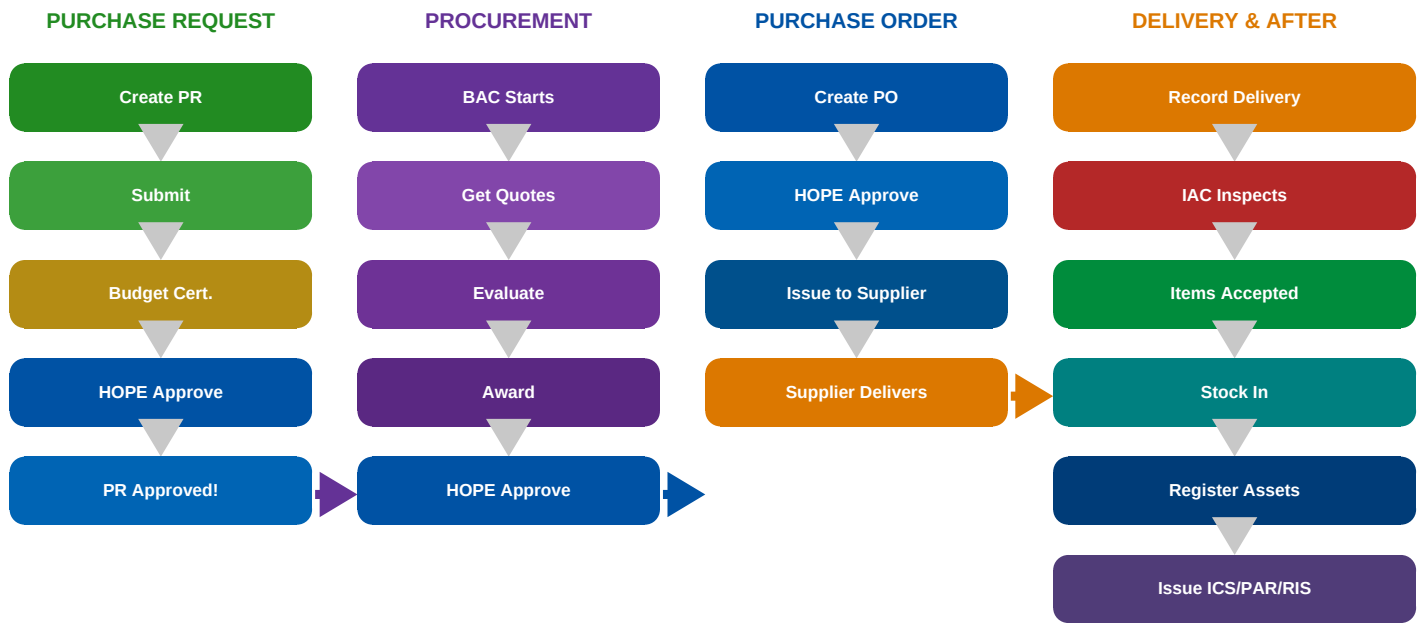

Property Acknowledgment Receipt

For PPE items (laptops, vehicles, large equipment over P50,000), you sign a PAR. The item gets a property number, is tracked for depreciation, and appears in the asset registry.

08

Complete Flowchart

End-to-end: From PR to asset registration

The Complete Journey:

Create PR >> Budget Check >> Approve >> BAC Procures >> Award >> PO to Supplier >> Delivery >> Inspect >> Done!

Quick Tips & Reminders

Before Creating a PR

- Make sure the APP is approved and your items are in it.
- Check your office's remaining budget allocation.
- Have item specifications and quantities ready.
- Watch for split-contract warnings (over P1M for goods in one year).

While Your PR is Processing

- Watch for notification badges -- they tell you what's happening.
- If your PR is returned, read the notes and fix the issues.
- You can track PR status anytime in the Procurement dashboard.
- Don't create duplicate PRs for the same items.

During Procurement & Delivery

- The BAC handles everything -- no action needed from you.
- You'll be notified when the award is approved.
- Delivery inspection is done by the IAC, not by you.
- If items are rejected, the supplier must redeliver.

After You Receive Items

- Sign the ICS or PAR when items are issued to you.
- You are responsible for items under your custody.
- Report damaged or lost items to the Property Custodian.
- All transactions are logged for COA audit compliance.

Glossary

PR	Purchase Request -- your formal request to buy items from the approved APP.
PO	Purchase Order -- the official order document sent to the awarded supplier.
OBR	Obligation Request -- reserves budget when PR is certified by Budget Officer.
RFQ	Request for Quotation -- sent to suppliers asking for their price offers.
SVP	Small Value Procurement -- buying method for items under P1,000,000.
BAC	Bids and Awards Committee -- manages the competitive procurement process.
IAC	Inspection and Acceptance Committee -- checks delivered items for quality.
IAR	Inspection & Acceptance Report -- official document of inspection results.
DR	Delivery Receipt -- records what the supplier delivered and when.
ICS	Inventory Custodian Slip -- receipt for semi-expendable items (under P50K).
PAR	Property Acknowledgment Receipt -- receipt for PPE/property items (over P50K).
RIS	Requisition & Issue Slip -- receipt when consumable supplies are issued to you.
APP	Annual Procurement Plan -- the division's approved list of items to procure.
HOPE	Head of Procuring Entity -- the Schools Division Superintendent (SDS).
PhilGEPS	Philippine Government Electronic Procurement System.
NOA	Notice of Award -- official letter telling the supplier they won.
NTP	Notice to Proceed -- tells the supplier to start delivering.
PPE	Property, Plant & Equipment -- high-value assets tracked with depreciation.
COA	Commission on Audit -- government auditing body.
